

## **ABOUT US**

Waywiz,LLC., was incorporated in April,2014 in the state of Georgia in USA.Our purpose is to revolutionize the process of obtaining addresses, directions and navigation to the intended destination using smartphones. The entire waywiz app along with the website with a downloadable widget simplifies the process of acquiring the address to one's destination. This eliminates the need to call offices, businesses, residences or stores to obtain the address, write down on paper, and transfer it to navigation/maps to obtain directions. Waywiz enables electronic address cards for various situations and locations that get transmitted to smartphones and automatically sync with maps/navigation .We offer store, business, personal, event and location templates which can be transmitted to anyone signed up with waywiz with a minimum of effort. Besides the use of **waywiz is absolutely FREE for everyone including businesses.** Moreover waywiz will possibly eliminate carrying business cards physically. One can send stored business address card to the client using smartphone instantaneously. We provide photo option on each template to better locate the destination with ease. Address on each template is hyperlinked to google maps and will automatically give direction and help in navigation using smartphones. Event cards are similar and will sync with one's phone / email contacts. This eliminates need to send email invitations for birthdays, parties, meetings, conferences, etc.

### **Waywiz capability:**

- 1.Unique address e-card stored on smartphones and Business websites.**
- 2.Business/address e-card sent to friends/customers with a click on the app on smartphone/business website.**
- 3.Address on e-card has hyperlink connects to Google map and will enable directions/navigation instantly**
- 4.Eliminates writing down addresses and carrying business cards.**

**5. Eliminates calling individuals and businesses for addresses or directions.**

**6. Businesses with websites have waywiz widget with electronic address card template on their website and customers can get it instantly on smartphone without having to call customer service for directions to businesses/restaurants/Doctor's offices/stores etc.**

**7. Businesses without websites can use the app website to send e-address card after registering at the site.**

**8. Invention to eliminate paper business cards. E-biz cards can be stored on the device and accessed whenever.**

**9. These e-address cards provide instant directions and navigation on smartphones unlike paper business cards.**

**10. Locating a person other than the office or home easily with location template. This app recognizes your current location with the hyperlink on the location tab and receiver gets your exact location using google map/navigation.**

**11. Photograph option in each template enables sender to provide photograph taken by his/her device, facilitating easy recognition of the location building or even the senders own photograph.**

**11. Maps and navigation take the recipient near the desired location and the photograph option will help recipient reach the exact desired location or the sender.**
